

AERONAUTICAL TELECOMMUNICATIONS NETWORK PANEL

Working Group 2

21st Meeting

Limerick, Ireland

11 – 14 July 2000

Changes Made to Draft Edition 3 of Sub-Volume 5

Working Paper

Presented by Klaus-Peter Graf
(Germany)

Summary

This paper provides a short summary of the changes made to Draft Edition 3 of Sub-Volume 5 (dated 10 December 1999) since the Tokyo WG 2 meeting.

The updated version of Draft Edition 3 of Sub-Volume 5 (dated 4 July 2000) is presented as Final Draft Edition 3 for the Berlin WG2 meeting under separate cover.

1 Introduction

For information of the WG 2 members, this paper provides a short summary of the changes made to Draft Edition 3 of Sub-Volume 5 (dated 10 December 1999) since the last WG 2 meeting in Tokyo.

The new version of Draft Edition 3 of Sub-Volume 5 resulting from this update and dated 4 July 2000 is available in electronic form on the ATNP archive and is presented in hard copy as Final Draft Edition 3 for the Berlin WG2 meeting under separate cover.

2 Summary of Changes

The following changes were made to Draft Edition 3 of Sub-Volume 5 (dated 10 December 1999) in the time period since the last WG2 meeting:

- 13 editorial corrections which have been identified and agreed during ATNP/3. For reference, these editorial corrections are documented in Addendum/Corrigendum No. 1 to the Appendix of ATNP/3-WP/7, i.e. the working paper presenting the proposed draft third edition of Doc 9705.
- The agreed changes of the following ten P3DRs which have been discussed during the IDG/4 meeting in Washington and subsequently published on the `wg2_sdm_list`:
 - P3DR M0020010
 - P3DR M0020011
 - P3DR M0020012
 - P3DR M0020013
 - P3DR M0020014
 - P3DR M0020016
 - P3DR M0020017
 - P3DR M0020019
 - P3DR M0020021
 - P3DR M0020022

Please note that there is one remaining P3DR, i.e. P3DR M00200015. This P3DR is recommended for discussion and resolution by the WG2 meeting.

- The changes associated with the following two PDRs which have been published and discussed on the `ccb_chair_list`:
 - PDR M0040001
 - PDR M0040002

Please note that the SARPs amendments associated with PDR M0040002 have been included in the updated version of Subvolume 5 although this PDR has progressed to the PROPOSED status only. Formal adoption of the proposed resolution of this PDR will not occur before the CCB meeting in Berlin. As no controversial opinions have been issued on the electronic presentation of the proposed resolution of this PDR and due to conflicting schedules between the upcoming CCB meeting and WG2 meeting, the SV5 editor has decided to proceed with the integration of this PDR into SV5. However, the WG2 meeting is advised to carefully review the associated changes (see also Change Control Log of Draft Edition 3 of Subvolume 5).

- 13 minor editorial changes which have been documented in the PDR M0060001.

3 Recommendation

The working group is invited to review the updated Final Draft Edition 3 of Subvolume 5 (dated 4 July 2000) considering the information presented above.
